

Do you think there was ever life on Mars?

We will be doing activities based on NASA science where your young scientist will investigate the evidence for past life-supporting environments on Mars!

These activities were designed to be inclusive. We invite you to share your own, your child's, and your community's knowledge on this topic.

How has a big new discovery impacted your life?

Can you share a story with our program?

WAYS TO GET INVOLVED

- Reach out to your program to share knowledge or suggest someone else who might do this.
- Come to the Science Showcase.
- Share what you know with your child at home. See the story prompts on the back.
- Scan the QR code to the right or visit <https://planets-stem.org/> to learn more.

Grantee

Pick 1 or 2 story prompts to discuss at home

Can you tell me a story about...

... a technology or tool that made a big difference in your life?

... why water is important to our family?

... a memory about the water where we live?

... a landform we live near?

... our landscape / the land on which we live?

... identifying parts of nature that are important to you like plants, rocks, minerals, animal tracks, etc?

... how you made an important decision? Did you follow a process? Who did you talk to?

Make it a two-way conversation:

What questions do you have about the science activities I am doing in my program?
