

What do you think the connection between water and life is like outside of Earth?

We will be doing activities based on NASA science where your young engineer will create a water reuse process to support scientific missions in space.

These activities were designed to be inclusive. We invite you to share your own, your child's, and your community's knowledge on this topic.

How has a tool or technology made a difference in your life?

Can you share a story with our program?

WAYS TO GET INVOLVED

- Reach out to your program to share knowledge or suggest someone else who might do this.
- Come to the Engineering Showcase.
- Share what you know with your child at home. See the story prompts on the back.
- Scan the QR code to the right or visit <https://planets-stem.org/> to learn more.

Pick 1 or 2 story prompts to discuss at home

Can you tell me a story about...

...contaminated water?

...observing water?

...water filters or other types of filters?

...using a process?

...designing something?

...improving something?

...sharing your ideas?

Make it a two-way conversation:

What questions do you have about the engineering activities I am doing in my program?
